Task 04 - Extracting rules from ML models

Task

Prepare some interactive demos, story and presentation on methods of extracting rules from ML models.

Hints

Start with collecting facts and knowledge with Gemini Deep Research or Grok Expert.

Try Lovable, v0 and/or the free version of Chatgpt to create a demo application of the topic.

1) In your presentation (time isn't limited), explain how the algorithms work and the innovations
2) Explain in general how the generated code works
3) Demonstrate GenAI literacy using GenAI to complete the task

Example of a web demo application:
